**Glen Selover, PE**, has joined Wilson & Company in the Albuquerque office, and brings significant expertise in transportation drainage and water resources projects.

“Glen is a great addition to our New Mexico team,” said Dan Aguirre, Senior Vice President and Municipal Services Division Manager. “His expertise in hydrology/hydraulics analysis, drainage, and water quality requirements will be of significant benefit to our clients, both in the southwest and elsewhere.”

Glen has more than 19 years of experience in design and management of hydrological studies, corridor studies, hydraulic modeling (culverts, storm drain, ditches, rivers, and outlet structures), water quality BMP design, green infrastructure, erosion control plans, pond design, bridge sizing, and scour analysis. Most recent projects have been roadway and drainage improvement projects for the City of Clovis and New Mexico Department of Transportation.

Mr. Selover is very knowledgeable in HEC-RAS, HEC 2, HEC-HMS, SWMM, StormCAD, PondPac, FlowMaster, CulvertMaster, HY-8, AutoCAD, Microstation, Inroads and Inroads Storm and Sanitary.

He has bachelor’s degree in civil engineering from the University of Central Florida, and is a registered professional engineer in New Mexico and Nebraska.
